EMPERY WORLD · PRODUCT OVERVIEW

EliteEW

Work layer ∩ secure perimeter

← Cover

Condensed entry for committee / CISO / adoption. No new promises.

Overview: gift to the world and your contour

A short page for people deciding whether to as an open work complex inside the organization.

What it is

= the organization's work desk (apps, files, projects, AI on your data)
a closed work layer (personal and work stay separated)
first-party code as a under AGPL-3.0-or-later.

Not a host-OS replacement. Not "100% protection." Not a certificate. Not "receiving the gift locks authors onto your payroll forever."

Formula — P1; license and copyleft — P3c; limits — P12.

Four questions

Question	Answer	See
What is given to the world?	First-party code: run, study, modify, redistribute under AGPL; reciprocal duties when you modify a network service	P3c
What is outside the gift?	Author staffing, SLA, official brand, foreign secrets	P3e · P12
Who stands the contour up?	Organization IT/security and/or an integrator; accompaniment is optional	P3g · P10c
How do we accept it in-house?	Source + commit/tag, artifacts, pilot, your own runbooks	P3f · Q&A

Editions

Cloud (hosted) · On-prem (organization contour) · Client/FoFline (device + channel; air-gap) — P10.
